

Deep-cycle Tubular Batteries(Flooded)

With more than 20 years of research and development in lead acid batteries, we can finally provide you for such deep cycle tubular batteries. Our deep cycle batteries can deliver more performance and value than ordinary batteries with its super heavy duty tubular plate.

The deep cycle battery is flooded and then it needs watering after used to ensure enough water to cover the plates of each battery. The deep cycle battery is mainly used in golf carts, Scrubber/Sweeper/floor Machine, Richshaw, Tricycle, and other electric vehicles.

Performance & Capacity

Golf /Utility Vehicles Battery Specification
